

2015-16 Report to the People

What an exciting and busy year for Bethel! We have received the Palmetto Gold Award again for General Academic Performance. STEM activities have been taking place in all of our classrooms throughout the year. Technology continues to be a major focus for us. Teachers received new MacBooks this year and we have implemented a new information sharing site called Canvas. This has been a great communication tool for our students, teachers, and parents.

We are now in a partnership with Winthrop University where we train their junior and senior interns in the field of education. This partnership also allows us to use resources available from Winthrop University and other schools in the partnership as well as allowing us to share our areas of expertise.

We continue to improve and update our facilities. We will have new classroom floors put in this summer and hopefully add some additional parking.

Bethel continues to have great parent and community support as well as district level support. The faculty is dedicated and always working hard. Our students are the best! All of these factors help Bethel continue to be an excellent school in an outstanding school district.
