Report to Parents 2017-2018

The 2017-2018 school year has been filled with exciting things at Ebenezer Avenue Elementary School! We have committed to doing “whatever it takes” to meet the needs of our students. We have continued our work with Professional Learning Communities throughout our building in order to make decisions based on data and in the best interest of each child. We believe all children deserve an education based on their individual needs.

Our School Improvement Council has worked in conjunction with our PTO this year to help us reach our goal of building a strong community among our students, staff, and parents. Our school has expanded our sphere of influence in the Rock Hill community by adding the Montessori program to our existing traditional and inquiry-based program. In February, we welcomed one hundred fifty students in the Montessori program to our campus. With new programs in place, it is essential we continue to create a strong community among our entire school community.

We look forward to continuing on the journey of moving our school towards greater levels of success as measured by students’ love of learning, parents’ satisfaction with home-school relations, and test results that prove academic growth of our students.
