Report to Parents 2014-2015

The 2014-2015 school year has been filled with exciting things at Ebenezer Avenue Elementary School! We have committed to doing “whatever it takes” to meet the needs of our students. We have established Professional Learning Communities throughout our building in order to make decisions based on data and in the best interest of each child. We believe all children deserve an education based on their individual needs.

Our School Improvement Council has worked effectively this year in striving to help us reach our School Improvement Plan goal of building a strong community among our students, staff, and parents. Each member has assisted in making personal phone calls to parents to invite them to special events at the school or to seek input from them on specific issues. Two parent-student “movie nights” have been planned and we have found these to be successful. The SIC has been working to provide support of our Sixth Grade Academy and met with our superintendent to share the success of the program at our school. Former students and parents provided outstanding reviews of the program.

Our school has been working to improve all areas, including a newly remodeled library. We invite parents to stop by anytime to see the transformation of the library with new murals, lighting, and furniture. Our students enjoy the new atmosphere and we hope many students will develop a lifelong love for reading while in this new setting.

We look forward to continuing on the journey of moving our school towards greater levels of success as measured by students’ love of learning, parents’ satisfaction with home-school relations, and test results that prove academic growth of our students.
