STEM STUDENT QUALITIES

Thinkers
Inquirers
Communicators
Innovators
Balanced
Compassionate
Knowledgeable
Trustworthy
Confident
Determined

Students learn in a nurturing environment of educators who expect them to excel in academics and character.

WHAT IS STEAM?

It is an acronym for Science, Technology, Engineering, Arts, and Math. STEAM schools provide an integrated curriculum with a focus on inquiry, questioning and opportunities for problem solving to think like an engineer.

STEAM schools concentrate on 21st Century learning skills which are in high demand in our global society. These include collaboration, communication, critical thinking, and problem solving skills.

STEAM education introduces engineering concepts into K-12 education and has the potential to increase learning and achievement in math and science, increase awareness of what engineers do, and boost students' technological literacy, according to recent report from the *National Academy of Engineering and the National Research Council*.

Parents need to know that early identification and mentoring by parents, families, civic groups, and teachers can encourage early STEAM success for students.

STEAM related jobs are the basis for a successful, globally competitive, and innovative S.C. and U.S. economy.
