Teacher of the Year
Stephanie Williams

I am a firm believer that a student needs more than just a teacher teaching. They need a teacher who invests in them, encourages them, and celebrates them. Daily, I try to live by this statement. I have continuously innovated my curriculum and classroom to match my students' needs, likes, and interests. Currently, within my classroom, you will see students creating words using wiki sticks, shaving cream, flour, magnetic journals, or an online magnet board. Students who struggle with focus will be using flexible seating that allows them to move and learn. When progress monitoring happens, students set goals to achieve. When these goals are achieved, they get a shout out from the principal. My innovation does not stop in the classroom. It is seen daily throughout the school as I am adapting to the needs of my students and coming up with unique ways to address their behavior and academic needs. - Mrs. Williams

Rookie Teacher of the Year
Sheldon Siders
