OSHA 10 Certification

The purpose of this Report to the Parents is to give an update on the performance and progress being made toward the school's improvement goals. In this report, we have provided brief goals, programs, activities, achievements, and awards that were earned by our students.

School Goals

- ◆ To increase the number of completers according to the state of South Carolina CTE requirements.
- ◆ To increase the number of graduating students who receive Career Ready status by achieving a certification and becoming a CTE completer in their Career Pathway.

Student Opportunities

FCTC students have the opportunity to participate in several student organizations as an extension of their respective programs. CTSO's help develop students in essential skills such as problem solving, communication, team work and interpersonal skills. They help students gain a positive image through competitive skill events, academic rigor, leadership development and service learning projects. Students who participate in CTSO's serve their communities and state with pride while gaining a competitive edge in the workforce and post-secondary colleges and universities.

News from FCTC

During the 2023-24 school year, FCTC has partnered with several community agencies and local businesses. The latest partnership is with Trane. We have had several meetings in reference to apprenticeship and internship opportunities with the company for rising seniors and looking forward to many more opportunities in the future.

FCTC is also in the works of partnering with MUSC and the Jr. Achievement of Greater Columbia. This partnership will include speaking engagements for our students with professionals within the MUSC agency and establish possible internships for our health science students who are interested in matriculating into the health care profession.
