Vision

The vision of Right Choice School is to build a foundation by inspiring success and igniting all students potential.

Mission

Meet the unique educational, social, and emotional needs of our diverse student population that will encourage students to embrace lifelong learning and be college and career ready.

We empower students to develop skills necessary for success in a global society. Right Choice School focuses on developing the “whole student” by emphasizing transferable skills leading to academic success and productive citizenship.

College Fair Fall 2015

This year as a School Improvement Council we identified three key areas that we are going to work on in order to improve Right Choice School. Our primary focus going forward is going to be working towards improving End of Course Exam scores. Second we feel that our NWEA MAP scores are below where they should be. And third we want to work towards better staff retention. During this school year we saw an improvement in some areas of the NWEA MAP test given to middle school students taken during the winter testing session. We are still waiting for the results of our high school student’s End of Course Exams. And we have filled vacancies that were left over from the end of the 2014-2015 school year for next school year.

This was our first year as a school. At the start of the school year we knew that we would be working with a very high at risk of dropping out population of students. We offer a blended learning model, which is a mix between teacher taught instruction and lessons on the computer. We use this model to give students the chance to work at their own pace. Moving forward we are going to

continue using this model in our classrooms. We are also going to put incentives in place for students who are making NWEA MAP and End of Course test goals. We already have a really awesome core group of staff in place at Right Choice School. Moving forward I would like to see these staff members receive extra training on blended learning and the successful implementation of blended learning in the classroom.

We also started a school house system as a way of helping and teaching students how to do the right thing and help out the community. At the end of every month which ever house has earned the most merits gets to participate in an afternoon celebration. These celebrations usually include food, music, and some games.

Next school year Right Choice School will be changing its name to Islands Academy. The student body asked for the name change because Right Choice is a name that is strongly associated with the districts disciplinary program. Right Choice will remain the name of the discipline program.
