## We Celebrate Diversity...

### Student Ethnicity

### Message from the Principal

Hunley Park Elementary School is on the verge of a tremendous breakthrough. We are beginning implementation of Personalized Learning and are part of the Talent Development Academy. Our teachers are being trained to use the rigorous curriculum of the Talent Development Academy and Personal Mastery. Our students take charge of their own education. Education is a high priority at Hunley Park Elementary, and our teachers work extremely hard to ensure the success of every student. I am confident that with the support of the District and the community, our school will advance from good to great! Our parents and community are behind us in our pursuit of academic excellence.

### What is Talent Development?

Talent Development Academy is designed to transform selected Title One elementary schools into Talent Development Academies (TDAs), places of rigorous and high level learning where academic talent is nurtured and developed, where underrepresented gifted and talented (GT) students become identifiable and perform at higher levels of achievement.

### Personalized Learning

Personalized Learning at Hunley Park Elementary School will transform the way students' learn. Teachers and students work together to make learning fun and attainable for everyone. Teachers work with their students to create a transparent curriculum that students can navigate and show mastery of all standards. Students are able to move at their own pace and show learning in a variety of ways. Students learn important 21st Century skills such as ; creative problem solving, communication, technology skills and teamwork.
