Problem Based Learning

**About This Report**

Sullivan’s Island Elementary School is helping students develop world class skills and life and career characteristics of the Profile of the South Carolina Graduate, by providing a safe, caring, and academically challenging learning environment. Instruction is aligned with state standards and integrates a coastal environment theme across all subject areas. Personalized learning, inquiry-based instruction and using the outdoors as a classroom are key components of our dynamic program.

The School Improvement Council is directly involved in the school improvement planning process and helping to carry out and evaluate the outcomes of our Strategic Plan.

SICs also report to the school’s parents and the community on how the school is progressing toward its improvement goals. One of the ways the SIC has facilitated this is through our 8 focus area groups or “Spokes”. These groups include teachers, parent volunteers that meet monthly. This process helps us integrate school initiatives, goals and funding proposals. Each Spoke reports to the SIC with accomplishments and needs of the focus area.

Our school hosted a Report to the Community Meeting on Tuesday, April 24, 2018. Students, teachers and parents were on hand to demonstrate and talk about how students are learning at SIES.
