## Mission

The Chesterfield High School's mission is to provide an academic environment that enables all students to earn a quality education, which in turn promotes lifelong learning, responsible citizenship, and success in the workplace.

## We Believe that...

- Student learning is our top priority and high expectations yield high results.
- All students can learn and learning is life long.
- All students have the right to earn a quality education in a positive and safe environment and to become productive members of a democratic and cohesive society.
- It is academically advantageous for students to learn in a cross-curricular environment in which they have hands-on learning and are actively engaged..
- All students should be treated with dignity and respect in learning environments that reflect appreciation and understanding of multicultural diversity.
- Schools should respond to changes in business, technology, community, and family structures.
- Schools should implement innovative teaching and learning strategies that reflect tomorrow's work force in a diverse society.
- Involvement in extra-curricular activities enhances a student's overall education and helps to develop life-long work ethics and social skills.
- Learning is the responsibility of each individual student and that parents and guardians of these students are responsible and accountable for actively supporting the learning process.
