

The Leader in Me

The Leader in Me is a whole-school transformation model and process—developed in partnership with educators—that empowers students with the leadership and life skills they need to thrive in the 21st century. It is based on secular principles and practices of personal, interpersonal, and organizational effectiveness. Distinct in several ways, *The Leader in Me* starts from a powerful premise—every child possesses unique strengths and has the ability to be a leader—which shapes the views of staff to value and develop the whole child. The process integrates leadership development into existing programs, curricula and traditions and serves as a foundational operating system for the school, improving relationships, transforming culture, and highly motivating staff and students. All stakeholders are impacted by *The Leader in Me*, starting with the staff of a school, then expanding to students, their families, and the community at large. This Inside-Out Approach is a key ingredient to successfully creating positive change in a school.
