Johnston Elementary is located in the heart of downtown Johnston, the Peach Capital of the World. Our school serves a diverse population of 320 students, child development through fifth grade. Regular classroom instruction is supplemented through such programs as the gifted and talented program, two computer labs, and school-wide Title One.

We believe that each child has the right to learn in a safe and caring environment. We recognize that an environment which is conducive to learning must include a challenging and stimulating curriculum. We strive to provide a student-centered hands-on program of instruction, which will support the whole child.

Our Instructional Programs

Johnston Elementary places a special emphasis on active student involvement in the learning process. A wide variety of hands-on materials and resources are available for student and teacher use including computer technology, math and science manipulatives, classroom libraries, and sets of children's literature. Our school has 2 computers per classroom, two computer labs, and a well-equipped media center to further enhance student learning. Teachers began implementation of a balanced literacy program to help students grow as readers.
