*Due to the COVID-19 pandemic, we are unable to have visitors or any non-essential workers in the building. However, our staff engaged in on-going professional development provided by "in-house experts" and a math consultant that focuses on rigor in the classroom, problem-based learning, high expectations for students and the use of data to change and focus instruction.*

## Mission Statement:

It is the mission of Williams Middle School to develop students that are creative thinkers, problem-solvers and collaborators that are prepared to compete in a global society.

## Vision Statement:

Provide the students of Williams Middle School with an educational experience that is both rigorous and relevant to ensure that students are college and career ready.

## School Motto:

One Team, One Goal

## Williams Middle School

Williams Middle School helps all students with the development of world-class skills and career characteristics as outlined in the Profile of the South Carolina Graduate. During this COVID Pandemic, we continued to work towards the goal of having all students be college and career ready by providing diverse learning opportunities and relevant activities that motivate our students toward success. With the adjustment of having to have both virtual and in-person learning, teachers were able to utilize the Google training they received to support the integration of technology within the classroom. Students are also participated in numerous afterschool opportunities in both academic and sports extracurricular activities.
