

Lake City Early College and CTE High School

Lake City Early College High School is helping all students develop the world class skills and life and career characteristics of the South Carolina Profile of the Graduate by preparing students who are equipped with the tools necessary to achieve success. Our school served approximately 758 students in grades 9 -12.

Through partnerships with Florence-Darlington Technical College, Williamsburg Technical College, and Francis Marion University more than 67 students participate in dual-enrollment classes, earning college credit while still in high school. As part of this partnership, we were able to continue the Lake City High School Early College— three cohorts of students graduated from LCHS with both a high school diploma and an associate's degree. We had 13 students who graduated with an associate degree from Florence-Darlington Technical College and 13 graduated with a certificate from Williamsburg Technical College.

Lake City Early College High School will continue with its Freshman Academy. This program is designed to enhance the 9th grade experience for our students and provide a smooth transition from middle school expectations to high school expectations.

Our Athletic Department was named a South Carolina High School League (SCHSL) Palmetto Gold and Sportsmanship recipient for the 5th year in a row. We had 15 student-athletes who were name scholar athletes by the South Carolina High League. The mandatory shutdown prevented our student-athletes from completing their community service.

The Lake City Early College & Career and Technology Education High School continues to grow and offers students opportunities to participate in work-based learning through internships and shadowing options. Our CTE program offers courses in Culinary Arts, Masonry, Health Science, Firefighting, Business, Building Construction, and Automotive Technology. In addition, we have partnered with Williamsburg Technical College to offer Welding, HVAC, Early Childhood Care, and Nail Tech certifications for our students. Additionally, we had two students complete certification in Fire Fighter I, five students to complete certification ASE certification in auto technology, five students earned certification in nursing assistance, three students earned certification in welding, one student earned NCCER certification in masonry, and three students earned certification in culinary arts.

Lake City Early College High School continued to focus on service learning to help students develop as community members. We increased our community partnerships by establishing mentoring and character education programs for different groups of students. We fully implemented Positive, Behavior, Intervention and Support (PBIS).

At Lake City Early College High School, we continue to work diligently to equip our students with the tools necessary to achieve success.
