

April 30, 2015

Dear Parents and BES Community,

The 2014-2015 school year has been one filled with high expectations for staff, students and parents. Our purpose this year was to extend our literacy- centered curriculum by pairing it with a strong curriculum-based assessment that would result in data-driven learning. We began our school year with professional development for teachers that would enhance and expand their knowledge and skills of classroom instruction and instructional delivery throughout the school year. We have compiled and gathered data that would drive our instruction to meet individual student needs and enhance the overall performance of all students.

Our students have been engaged in activities that range from meeting their individual academic needs through core academics, as well as the arts and participating in self-esteem programs. We have offered Saturday Academy, After School Program with Club Day activities, and have made plans for our Summer Reading Program. Grade level classes have offered fieldtrips that enrich the curriculum and extend learning beyond the classrooms.

Thanks to the community for their support during Fall Festival, Write Night, Reading Night and our Math and Science Night activities . We would like to thank our SIC, PTO, BJT, civic organizations, Wal-mart and Honda along with all other local businesses and other affiliates that have supported us with their actions as well as good wishes for a successful school year.

We can only look towards the future and hope that our successes will be unlimited. Thank you for being a part of the Brockington Elementary community of support.

Educationally yours,

Mary T. Brayboy, Principal
Willie J. Green, SIC Chairperson
Ashley Ward, SIC Vice-Chair
