

Mission Statement

The educational philosophy of the Aiken County Career and Technology Center is consistent with the philosophy established by the State Department of Education.

The Career Center attempts to offer all students of Aiken County, without regard to creed, race, gender, age, disability, or economic circumstances, a curriculum with competency-based outcomes, quality instruction, technical information, and practical application, designed to promote opportunities for emotional, personal, social, and intellectual growth. The Career Center strives to communicate a realistic vision of the work environment and provide leadership and services needed by students to achieve their educational and career goals.

It is the Center's responsibility to develop programs that emphasize sound work ethics and teach up-to-date technical and academic skills with the flexibility to change as technology advances.

**Twelve Years
In A Row**

Roll of the SIC

- Assist in assessing the five year plan.
- Assist in writing of the annual updates if needed.
- Assist on the spending of funds if the school receives awards.
- Assist in preparing the Report to Parents.

Revised Action Plan

1. By spring 2014, 19% of ACCTC's completers will score at the Gold Level for Work-Keys on Reading, Locating Information, and Applied Math.
2. By spring of 2014, ACCTC will increase its enrollment by 2% annually
3. By 2014 ACCTC will have 100% of the teachers achieving state-recognized certification in their technical area.
4. By spring 2014, 100% of the certified staff at ACCTC will be 'highly qualified.'
5. By spring 2014, 88% of ACCTC Stakeholders will indicate satisfaction with the learning environment, social and physical environment, and school-home relations at ACCTC
