OUR VISION

The vision of Simpsonville Elementary stems from a child-centered focus on improving the curriculum, instruction, assessment and environmental factors that support effective learning for our students.

OUR MISSION

The mission of Simpsonville Elementary is to prepare students to be productive, respectful and responsible.

Look inside for details about our Goals, Accomplishments, Activities, and PASS Results.

Simpsonville Goals for 2012 – 2013

Goal #1:

Raise the academic challenge and performance of each student. Increase the percentage of students scoring proficient and above on PASS by 5% each year in English/Language Arts and Mathematics

Goal#2:

Provide core content teachers with professional development activities so that our ELA and Mathematics goals for student achievement will be reached by 2013.

Goal #3:

Improve public understanding and support of our school.

Top Ten District Teacher of the Year 2009-2010
Project Fit America Fitness Program
School Nurse – GCSD & SC State School Nurse of the Year 2012

SIMPSONVILLE ELEMENTARY: WHERE ARE WE GOING FROM HERE

Students at Simpsonville Elementary are being offered a culinary lunch program which includes fresh salads, soups, and healthy entree choices, and participating in Project Fit America activities as part of our fitness initiative.

The PTA and SIC (School Improvement Council), as well as parent and community volunteers have contributed to the school, meeting many goals as it has expanded its programs over the last few years. Volunteers contribute their time in the classroom, in before-school programs, and at special events.

Raising student academic achievement is a top priority. We identify students needing extra assistance in reading in the early grades and provide a small group tutorial program, called RTI. We also provide a before-school computer based math program, called Larson's Math, for older students. This program is supported by our local volunteers who faithfully run the lab each morning.

Our school will continue to identify educational needs and work constantly toward improving the educational opportunities offered. Through the dedication and high expectations of the administration, faculty, staff, and families, the Simpsonville Elementary School community can expect continued academic and instructional growth of students. Students have shown growth each year for the past 5 years on state-wide testing. Members of the community are invited to take an active role in our educational program.
