WKE BELIEFS

We believe every child must feel loved and have a sense of belonging to engage in the risks required to learn.

We believe all children can learn and learning should be personalized to student needs.

We believe community and family involvement are an essential part of school culture and student success.

We believe students learn best when they are actively engaged in the work of meaningful learning.

We value everyone in our school community and believe in treating them with dignity, courtesy, and respect.

We believe in setting high expectations for every student and challenging them to reach their full potential.

We believe in developing the whole child through academic activities that support the social and emotional growth that leads to independence.

At White Knoll Elementary, we believe that love comes first. We focus on building lasting relationships with students and families to assist each child in reaching their full potential. We have a full-time family liaison who works hard to serve the needs of the whole child by providing resources to families in need. Through her relationships with our community, we have increased the families we serve in this capacity by 200%. We have also created a community closet and expanded our community partnerships.
