Over 10 School Clubs for grades 3-8

Thanks to a grant funded by NC State University, our 3-8 grade students have the opportunity to learn through STEM (science technology engineering and math) activities such as robotics, embryology (hatching chicks), and hive helpers (bee keeping).

After School Program

The STEM and Coding projects enabled our afterschool program in grades 4-8 to incorporate technology and engineering into our regular math and science curriculum, as well as the English language arts where students experienced a collaborative culture. This type of culture will ensure to inspire learning where students will achieve readiness levels for citizenship, careers, and college. Along with the STEM project, students began a Coding project, which included an introduction to robotics

Accomplishments

Dino Quick, Nori Adams, Keyshawn Purvis, and Kaden Johnson placed at the Pee Dee Regional Science Fair.
