I-Ready Growth Assessment

What is I-Ready Growth and what does it measure?

The i-Ready Diagnostic is an adaptive assessment that adjusts its questions to suit your student's needs. Each item a student sees is individualized based on their answer to the previous question. For example, a series of correct answers will result in slightly harder questions, while a series of incorrect answers will yield slightly easier questions. The purpose of this is not to give your student a score or grade, but instead to determine how best to support your student's learning.

Typical Growth

Typical Growth demonstrates the annual growth for an average student taking the *i-Ready Diagnostic*. On its own, it is an insufficient source of information to improve student outcomes because it is a normative measure that is not focused on grade-level proficiency.
