We believe that:

- All students can achieve.
- Stakeholders share the responsibility for students learning.
- Instruction should be innovative and creative in order to meet the unique needs and interest of all students.
- Students should be respectful of themselves, their surroundings and others.
- Students should be encouraged to develop a life-long desire to learn.

School Motto:
**Reaching a child's mind
is to capture his heart.**

Carver-Lyon Elementary School

2010

This report summarizes Carver-Lyon's progress, accomplishments and challenges for the 2011-2012 school year. Its annual production by the School Improvement Council is required by Act 135 as passed by the S.C. General As-

Our Mission

The mission of Carver-Lyon Elementary School is to provide a foundation for each student to develop his/her maximum potential for life-long learning in a safe, nurturing environment with active community involvement.

History of Carver-Lyon Elementary

In August of 1999, two elementary schools were combined to form the current Carver-Lyon Elementary School. The first principal of the Carver-Lyon Elementary School was Dr. M. Diane James.

Carver Elementary School was named for Dr. George Washington Carver, noted black scientist. The school was elected in 1938 to take the place of the old Leevy Grade School, located on the same site. Carver first served elementary grades 1-3 and junior high grades 7-8. From 1945-1949, even high school students, grades 9-12 were served here. The facility housed as many as 1,300 students, using several portable classrooms and served as an extension of C.A. Johnson High School.

Carver Elementary School was named for Dr. George Washington Carver, noted black scientist. The school was elected in 1938 to take the place of the old Leevy Grade School, located on the same site. Carver first served elementary grades 1-3 and junior high grades 7-8. From 1945-1949, even high school students, grades 9-12 were served here. The facility housed as many as 1,300 students, using several portable classrooms and served as an extension of C.A. Johnson High School.

Our School Today

Currently, our enrollment is 395 students from CD—5th grade. Dr. LeConte' Middleton serves as our dynamic principal and believes in educating the whole child by recognizing and focusing on their academic strengths and leadership potential. There are approximately 40 classroom teachers and 20 support staff members.

- **Building Supervisor**, Mr. Hector Anderson

Instructional Support Team

Principal, Dr. LeConte' Middleton

- **Curriculum Resource Teacher**, Mrs. Doris Williams
- **Guidance Counselor**, Mr. Melvin DuBard
- **Reading Teacher**, Mrs. Shawnta Davis

Our Goals and Strategies

Each year, every S.C. public school must determine goals for a renewal or improvement plan. Carver-Lyon's goals and progress for 2010-2011 are:

Goal 1. Students will demonstrate *academic progress* as evidenced by improvement on various informal and formal assessments.

Strategies: Raising test scores is an ongoing goal. Teachers collaborated with each other and engaged in meaningful professional development opportunities.

Goal 2. Students will utilize technology as an instructional and individual tool for learning and communication.

Strategies: Richland School District One's Instructional Technology Services has outfitted the Media Center, Success Maker computer lab and classrooms with desktop computers, laptops, white boards, projectors, and digital cameras for teacher's school-wide use.

Goal 3. Teachers will participate in professional development, and learning opportunities that encourage innovative instructional delivery and implementation of 'best practices' in education.

Strategies: Literacy study sessions, on-site consultants, self-reflection, after-school strategizing workshops for teachers, and weekly grade-level planning.

Goal 4. Parent and community involvement will increase during school hours and in after-school programs and functions, in number of parents and community volunteers, in percent of parents that express satisfaction with our educational program and facilities, and in involvement with faith-based partnerships with community churches.

Strategies: Parent grade-level meetings and conferences, faith-based community partnerships, Lunch Buddies, Academic Recognition Programs, Books and Breakfast, and student mentors.
