Greetings from the  
Principal

At Mabry Middle School, we recognize that each student learns in their own unique way. In an effort to ensure all students are successful, our faculty uses a differentiated approach to teaching and quality classroom assessment practices. Students are provided with a variety of learning opportunities and authentic learning tasks in an effort to realize their full potential. We continue to be committed to helping students achieve their full potential and recognize that they have a responsibility to care for themselves and for others in our school and in our community. We do our very best to make sure your child grows academically, socially and emotionally so that they can develop the ability, passion and imagination to pursue their dreams and achieve their future goals.

Mabry Middle School believes it takes an entire community to raise a child and as such, I strongly encourage parents to take an active role in their child's learning. Parents are welcome and encouraged to visit our school to support their child as well as the greater school community. A safe, structured environment will allow for a climate that supports relationships among students, faculty, parents and community members. It is these relationships that support student learning, academic achievement and citizenship skills. Through a collaborative process, students are provided the necessary supports to ensure growth and success in school and in life. Education is a life-long journey.....let's take it together!

Marsha Clark, Principal, Mabry Middle School
